

# **1 Title and author of paper**

OptiRun by Janicke Falch.

# **2 Summary of paper**

The project is for Altibox, a subsidiary company of Lyse Group. Instead of having to perform software testing manually, the purposes of the thesis is to present a solution that automates these tests.

# **3 Good points about the paper**

The first chapter does a good job of introduction the problem at hand. The chapters and sections are divided and named well. Each chapter is well presented in the first paragraphs. The figures look good, and paper is visually pleasing.

# **4 Recommendations**

Nothing really. Looks good so far.
